

PROJECT LIST - TU GRAZ ACADEMIC 2022/23 OFFER FOR UNS FACULTY OF SCIENCES  
**SUMMER SCHOOL OF CHEMISTRY**

Project Title	Institute	Supervisor	Contact
Selective biotransformations for the utilisation of renewable resources.	Molecular Biotechnology	Robert Kourist	<a href="mailto:kourist@tugraz.at">kourist@tugraz.at</a>
Inhibition of chorismate synthase and crystallization of enzyme-inhibitor complexes.	Biochemistry	Peter Macheroux	<a href="mailto:peter.macheroux@tugraz.at">peter.macheroux@tugraz.at</a>
Radical and photochemistry applied to materials (polymers, nanoparticles) connected to basic research aspects.	Physical and Theoretical Chemistry	Georg Gescheidt-Demner	<a href="mailto:g.gescheidt-demner@tugraz.at">g.gescheidt-demner@tugraz.at</a>
Porous materials encapsulating bio-active molecules and proteins. The goal is to synthesize the materials, characterize and evaluate them.	Physical and Theoretical Chemistry	Paolo Falcaro	<a href="mailto:paolo.falcaro@tugraz.at">paolo.falcaro@tugraz.at</a>
Synthesis of organometallic compounds, nanoparticles and materials with an emphasis of analytical characterization.	Inorganic Chemistry	Frank Uhlig	<a href="mailto:frank.uhlig@tugraz.at">frank.uhlig@tugraz.at</a>
Synthesis of biologically active carbohydrate analogues (glycomimetics). Biological evaluation of glycomimetics for bio/medicinal applications.	Chemistry and Technology of Biobased Systems	Tanja Wrodnigg	<a href="mailto:t.wrodnigg@tugraz.at">t.wrodnigg@tugraz.at</a>
